CETIN expects its 2017 results to be in line with the long-term trend

February 20, 2018

Česká telekomunikační infrastruktura a.s., CETIN, expects, that **its financial results for 2017 will be in line with the long-term trend, established by the published results of the previous years and of 1H2017.**

Following the first indicative information for the full year 2017 CETIN expects a moderate year-on-year decline in the domestic network services segment, driven mainly by the decline of the number of fixed connections and revenue from data services. The impacts of this decline are partly compensated by the growth of mobile revenue. CETIN continued boosting strategic investments in the development of new generations of fixed and mobile networks.

The audited financial results for 2017 will be published as part of 2017 Annual report, expected to be released on March 8, 2018.
